

# **JOB OFFER**

## **TITLE: IT Technician**

### **Company profile:**

The Ohmega Group has been operating since 1982 in a variety of fields including Automation and Industrial Computing, Electricity, Mechanical and Plumbing. The company is presently in an important growth phase in the automation and industrial computing sector in Canada as well as in the United States. The Ohmega Group has 3 places of business including Gaspé (Qc), Calgary (Ab) and Kanata (On) and will be increasing its presence in the Mid-West of the US in the current year.

### **Candidate profile:**

We are currently looking for a candidate who demonstrates talent in problem solving, analysis and decision making in a complex technical environment. The main task of the candidate will be to provide technical support to our customers on site or remotely. The candidate will have to investigate, manage and resolve information technology problems. They will have to offer optimal solutions to our customers and promote the company's products and services to ensure the success of the organization. The qualified candidate will be a full member of our growing team and must demonstrate initiative, independence and strong communication skills.

### **Responsibilities:**

- Carry out industrial IT projects at different stages (evaluation, development, installation and commissioning, maintenance and optimization);
- Investigate, repair and debug various IT networks;
- Programming of various IT equipment (firewalls, routers, switches);
- Configure and maintain industrial computers, servers and storage equipment (OS, virtual machine, network interfaces);
- Configure and manage different type of databases (owner historian, Oracle, SQL);
- Design complete IT infrastructure and computer systems;
- Carry out field interventions and participate in remote support of our client's operations;
- Production of technical documentation.

**Competencies and experiences required:**

- College degree in Information Technology, Computing Science or related field;
- At least 3 years experience in industrial IT/OT and computing, preferably in the engineering services sector;
- Ability in programming (Ex : VB, VBA, C#, C++ .net);
- Good knowledge of virtualization architecture
- Good knowledge of servers and storage (Server management, RAID, NAS, SAN, iSCSI, SAS, Tape backup etc. )
- Experience with IT, networking and Cybersecurity equipment, with different manufacturers (Ex : Cisco, Fortinet, Checkpoint, Palo-Alto, Juniper, Tofino etc.);
- Experience with IT/Cybersecurity framework ( Ex : NIST, ISO-27001, NERC-CIP, COBIT etc. );
- Experience in database configuration and reporting;
- Security certifications for construction sites would be an advantage;
- Fluency in written and spoken English / a knowledge of French would be an asset.

**Salaries and benefits:**

- The position to be filled is a permanent and full-time job;
- Salary will be determined on experience basis;
- Medical / salary / disability / life insurance program in place;
- Possibility to contribute to a Registered Retirement Savings Plan jointly with the employer.

**Principal Workplace:**

The Edison  
150, 9th Ave SW, 23rd Floor  
Calgary, AB

**Start date:**

- As soon as possible
