

# JOB OFFER

## TITLE: Senior IT Project manager

### **Company profile:**

The Ohmega Group has been operating since 1982 in a variety of fields including Automation and Industrial Computing, Electricity, Mechanical and Plumbing. The company is presently in an important growth phase in the automation and industrial computing sector in Canada as well as in the United States. The Ohmega Group has 3 places of business including Gaspé (Qc), Calgary (Ab) and Kanata (On) and will be increasing its presence in the Mid-West of the US in the current year.

### **Candidate profile:**

We are currently looking for a senior IT project manager capable of succeeding in complex technical environments, with significant experience and a good understanding of the different stages of an IT project. The successful candidate must have the capacity to estimate and provide recommendations based on their experience and industry best practices.

The qualified candidate will need to have excellent communication skills to provide support to the General manager and the concerned teams. Also, will have to manage, plan, organize and coordinate all project stages on a daily basis.

### **Responsibilities:**

- Manage, plan, coordinate and oversee the implementation of industrial IT projects at different stages (evaluation, development, installation and commissioning, maintenance and optimization)
- Verify that the information pertaining to the project meets the needs expressed by the client,
- Lead and coordinate project activities from initiation to close out (i.e. scope, schedule, resource and cost management),
- Coordinate and/or carry out field interventions and participate to the remote support of our client's operations;
- Supervise and/or produce technical documentation;
- Coordinate communication channels with other organizational projects.

**Competencies and experiences required:**

- Bachelor degree in Information Technology, Computing Science or related field;
- More than 5 years experience in project management;
- More than 10 years experience in industrial IT/OT and computing, preferably in the engineering services sector;
- Good knowledge of virtualisation methods and software;
- Good knowledge of servers and storage (Server management, RAID, NAS, SAN, iSCSI, SAS, Tape backup etc. )
- Experience with IT, networking and Cybersecurity equipment, with different manufacturers (Ex : Cisco, Fortinet, Checkpoint, Palo-Alto, Juniper, Tofino etc.);
- Experience with IT/Cybersecurity framework ( Ex : NIST, ISO-27001, NERC-CIP, COBIT etc. );
- Design complete IT infrastructure and computer systems;
- Security certifications for construction sites would be an advantage;
- Fluency in written and spoken English
- A knowledge of French would be an asset.

**Salaries and benefits:**

- The position to be filled is a permanent and full-time job;
- Salary will be determined on experience basis;
- Medical / salary / disability / life insurance program in place;
- Possibility to contribute to a Registered Retirement Savings Plan jointly with the employer.

**Principal Workplace:**

The Edison  
150, 9th Ave SW, 23rd Floor  
Calgary, AB

**Start date:**

- As soon as possible
