

## **The Ohmega Group is looking for you**

**You are an experienced INDUSTRIAL ICT PROJECT MANAGER who is looking for a position that will propel your career in the renewable energy field. You are willing to join a dynamic, devoted and motivated team in the fields of industrial computing, new technologies, Cybersecurity, design and programing.**

The Ohmega Group team is comprised of highly skilled professionals who are passionate about renewable energy and the exciting opportunities it offers. We are also involved in the fields of water, wastewater and industrial automation. Originated from Quebec and established since 1982, we are specialised in automation and Industrial Computing. The company is in a sustained growth phase across North America.

We are always up for a challenge and eager to develop new industry expertise. We offer an inclusive work environment where we foster a culture of continuous learning and development You will be part of particularly effective teams of individuals as unique as the clients they serve.

### **Candidate profile**

As a Project Manager in our team, you will be capable of succeeding in complex technical environments, with significant experience and a good understanding of the different stages of an ICT project. You will have the capacity to estimate and provide recommendations based on industry best practices. You will demonstrate initiative, self-reliance and strong communication skills to provide support to concerned teams.

Your main responsibilities will be to:

- Manage, plan, coordinate and oversee the implementation of industrial ICT projects at different stages (evaluation, development, installation and commissioning, maintenance and optimization) according to the availability of human, material, financial and information resources;
- Verify that the information pertaining to the project meets the needs expressed by the client;
- Lead and coordinate project activities end to end (i.e. scope, schedule, resource and cost management);
- Coordinate and/or carry out on-field interventions and participate to the remote support of our client's operations;
- Supervise and produce technical documentation;
- Coordinate communication channels with other organizational projects.

**Must have**

- Bachelor degree in Information Technology, Computing Science, Automation or related fields;
- More than 5 years experience in industrial IT/OT and computing, preferably in the engineering services sector;
- More than 2 years of experience in project management;
- Fluency in written and spoken English.

**Nice to have**

- Good knowledge of virtualisation methods and software;
- Good knowledge of servers and storage;
- Experience with IT, networking and Cybersecurity equipment, with different manufacturers;
- Knowledge of French would be an asset.

**Salaries and benefits**

- This is a permanent and full-time position;
- Attractive remuneration including medical, salary, disability, life insurance program;
- Possibility to contribute to a Registered Retirement Savings Plan jointly with the employer.

**Principal Workplace**

Stephen Avenue Place  
700 2nd St SW, 20th floor  
Calgary, AB

**Start date**

- Currently open and to be discussed
